

Grundfos iSOLUTIONS: The Answer to Intelligent Pumping Systems

Chennai, August 23, 2013: Grundfos Pumps India Pvt. Ltd. (Grundfos India) today organised an industrial event in the city. The event showcased a range of pump solutions for various industries. The event saw the participation of over 250 industrial delegates from across India.

Experts from Grundfos believe that for 80% of all pump installations, intelligent pump systems mean large savings and can cut a business's energy consumption by as much as half. The key to maximum efficiency is widely recognised as optimising the whole pump system and not only the pumps. During the event, Grundfos India also showcased 'Grundfos iSOLUTIONS', a holistic system approach with intelligent technology solutions that can be customized to system demands, creating optimal performance and the lowest possible energy consumption.

Grundfos iSOLUTIONS combines the full spectrum of the Grundfos offering, including standard and integrated pumps with controls, sensors, variable frequency drives, connectivity and software to create the ultimate intelligent solution. The company takes full responsibility from design, development and production to installation and maintenance throughout the service period of the pump system. This means that Grundfos iSOLUTIONS guarantees an intelligent solution tailored perfectly to the pump task at hand, leading to less downtime and lower failure rates.

Commenting on the occasion **Niels Fielsøe Petersen, Regional Business Director, Grundfos Holding A/S** said, "Grundfos continuously invests in new technologies that help us retain the leading edge in servicing customer requirements efficiently. The company's industrial solutions stand for quality, efficiency, wide range, competence and support the world over. In India we are focused on industries such as chemical & process, core, energy and transportation".

Grundfos India is working towards helping Indian industries and corporates save both energy and water through its highly energy efficient pump solutions. Commenting on the company's sustainability focus, **Ranganath N. K., Managing Director, Grundfos India** said "Grundfos India is in a unique position to help improve energy efficiency of pumping solutions in industries in the country. We believe that our ability to pioneer and deliver superior energy efficient and environmentally friendly solutions to solve problems not only helps industries save money but also helps reduce their carbon and water footprint".

Grundfos' Industrial Solutions caters to a wide range of segments including:

- **Transportation** – Automobiles, Tyre and Aerospace
- **Energy** – Power, Oil and Gas
- **Chemical & Process** – Chemical, Process, Pharma, Food & Beverage
- **Core** – Cement, Steel & Mining

About Grundfos India:
